Elect Officers

A baseball meeting was held last week. The following officers were elected: Manager B. Hummel, assistant manager Fred Watts, secretary G. K. McLean, ground committee M. F. Hamilton, A. W. Dopping and I. Fisher. Following is a line-up of the team: F. Watts, M. F. Hamilton, Jimmy Walker, Alex. Lott, Dick Lott, F. Rhoades, Tom Campbell, P. Bustin, Fred Steeles, Clarence Roney, Jack Kalpas, Harry Matlock and George Hargreaves.

Social Credit Meeting

At the Social Credit convention held in Vulcan on Saturday, sixty-five delegates were present besides a number of visitors. The theme song was O Canada were sung at the opening. In choosing the names to be placed before the advisory committee at their meeting in Lehighville, Rev. D. Owen received 58 votes, Mr. Irwin, Arrowwood, 53, Harry Allergoth, Milo 51, and Rev. Russell, Vulcan, 47. One of these will be selected as candidate for Social Credit in the Little Bow constituency at the coming election.

Relative Here

In the Jubilee programme over the radio, mention was made of the present King and Queen's visit to Australia as Duke and Duchess of York. Mention was also made of the English lady who had the honor of meeting them and accompanying them to the place of interest in that part of Western Australia. This lady was Mrs. Henry Lesson who is a sister of Mrs. Fred Alcock.

To Be Discontinued

Local Theatre Bank Night was built up to \$15.00. Next Wednesday night, May 22nd, will be, and further notice, the final Bank Night. The honor of the ticket number drawn on that night will be given \$15.00, and if the owner of the ticket number is not in the audience the \$15.00 will be sent to the Jubilee Cancer Fund as a donation from the patrons of the Champion Theatre.

Announcement

A notice of marriage is made for Miss Viva Hopkins is engaged to be married on the 30th June, to Mr. Max Beach of Los Angeles.

Christian Science

At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Mistake and Immortality." The following is one of the scriptural quotations contained in the Lesson-Sermon: "Now after John was put in prison, Jesus came into Galilee, preaching the gospel of the kingdom of God. And saying the time is fulfilled, and the kingdom of God is at hand; repent ye, and believe the gospel" (Mark 1:14,15). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 455): "Let Christian Science be the great center, support, and understanding of being, and this understanding will supplant error with Truth, replace material with immaterial, and silence discord with harmony."

India, it is anticipated, will have a three per cent decrease in her wheat acreage compared with last year, the estimated wheat average this year being placed at 23,811,000 acres, according to the Agricultural Department of the Canadian National Bank. Cold and frost are said to have adversely affected crops.

Paper On King's Reign

The Champion Women's Institute met at the home of Guy F. Dow, with Mrs. S. M. McMath as hostess, on Tuesday afternoon, May 14. Mrs. J. H. Bustin gave a very interesting account of King George and Queen Mary in the paper on "Twenty-five Years a King." Mrs. J. D. Hagerman, our constituency convener, was present and gave us a talk on "Ideals." Betty Caldwell and Louisa Stephenson favored us with a piano duet. Mrs. M. G. Clever was chosen as the delegate to the Provincial Convention at Edmonton next week. The committee were chosen for the June meeting, which is the 20th anniversary of the Champion Women's Institute. A delicious lunch was served by Mrs. McMath and Mrs. Stephenson.

Champion Is Now Member Of League

A baseball meeting was held in Staveley on Sunday afternoon, the Foxhills baseball league was organized to operate during the 1935 season with six clubs: Champion, Charesholm, Blackie, Granum, Staveley and Nanton.

F. Brock of Staveley was named president of the league with Barney Hummel as vice-president, and R. L. King of Charesholm as secretary. Members of the executive included: Sister of Blackie, "Hay" Bow of Staveley; E. Davidson of Charesholm; J. McKenzie of Nanton; A. Fleming of Granum; and M. F. Hamilton of Champion.

The opening of the league is scheduled for Wednesday, May 22th when the following games will be played: Charesholm at Granum, Staveley at Nanton, Blackie at Champion.

From The Carmangay Sun (Twenty Years Ago)

BOIRN—At Champion, on May 14th to Mr. and Mrs. A. L. Miller, a daughter.

Emmanuel church, Carmangay, was the scene of a very pretty wedding on Thursday, May 10th, when Alice May, the only daughter of Mr. and Mrs. F. C. Alcock of Champion, was joined in the holy bonds of matrimony with Miles Daane Chamberlain, the ceremony being performed by Rev. F. Taylor. As the bride entered the church leaning on the arm of her father the wedding march was played by Mrs. (Rev.) Taylor. The bride was very becomingly gowned in embroidered white net and tulle veil and orange blossoms, and carried in her arms a beautiful bouquet of white carnations. The groom was attended by Mr. H. Robert Williams. The popularity of the bride and groom was shown by the large number of friends both from Champion and Carmangay that gathered to witness the ceremony. After the ceremony an informal reception was held at the home of Mrs. W. B. Blackie, when a large number of friends had an opportunity of offering their congratulations. The happy young couple took the evening train for Calgary where they will spend a few days. On their return they will reside in Champion, where Mrs. Chamberlain will be at home after May 10th.

A large number from town attended the David Copperfield picture show at Vulcan on Monday.

"The FIRESIDE
PHILOSOPHER"
By ALFRED BIGGS

Tricksters can't face a steady eye.

Harsh words always hurt the speaker.

Adverse criticism often is mere jealousy.

Mean people always expect most generosity.

Some folk find happiness in being unhappy.

No man ever realized fully his potentialities.

It is easier to excuse one's bad habits than to overcome them.

Helps Building Industry

Chemistry Comes To Aid With Many New Materials

Even eggs and milk may enter the making of new construction materials in a building boom predicted by famous chemists at the opening session of the American Chemical Society's tercentenary celebration in New York.

A boom in the building industry inspired by discoveries of chemists, many of them made during the depression, was forecast by Prof. James R. Withrow of Ohio State University.

Artificial stones are already made in every color and with any degree of hardness a customer desires. Wood rot and metal rust are both stopped by numerous new protectives.

Bricks that partake of the lightness of lightweight and other light weight construction materials promise much higher, yet even safer skyscrapers.

Queen Mary's Tea Chest

Gift From Ceylon To Be Exhibited In Toronto

Visitors to the Ceylon exhibit, at the forthcoming Canadian National Exhibition in Toronto will have an opportunity to see the beautiful chest presented to Her Majesty at Christmas by the Empire Tea Growers. The chest is made of rare and lovely woods—rosewood from India, Indian satinwood and ebony from Ceylon and purchased from British Guiana, the woods being left in their natural state at the express wish of Her Majesty. The chest is 4 feet high and 3 feet wide and contains the Queen's own royal cypher. When presented to Queen Mary the chest contained fifteen pounds of the finest grown Ceylon tea, valued at over \$3 per pound.

NOT A RHEUMATOID PAIN FOR 4 YEARS

70-Year-Old Man Praises Kruschen

A man who once suffered severely from rheumatism writes: "I am now 70 years of age, and feeling fine, and always able for my day's work—thanks to Kruschen." A. S. Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush those dissolved crystals clean out of the system. "Then if you keep up 'the little daily dose,' excess uric acid will never form again."

Of Canadian Make

Domestic Supplies Medium-Quality Gauntlets For Every Cyclist

Motor and motor cyclist in the United Kingdom wear leather gauntlets when driving during the winter. Even during the summer months cyclist cyclists use them to work their handle bars at night.

A large proportion of the medium-quality motor cyclist's gauntlets are of Canadian make, according to the Industrial Department of the Canadian National Railways. While the British are experts when it comes to sheepskin gloves, strange as it may seem, in the case of those made of heavier leathers, such as cow, mule and horse hide, they have to be imported.

A Dangerous Procedure

Doctors Warn Against Forcing Givings Of Cold Liver Oil

Dr. Irving Graef, pathologist of Bellevue hospital, New York, to the American Association of Pathologists and Bacteriologists, mineral oils and animal fats drawn into the lungs of infants and adults had proved fatal in six cases of pneumonia. Cold liver oil, described as gold when taken into the stomach for bone building, Dr. Graef said was deadly when it entered the lungs. He cited one case to show the oil had entered the lungs through the nose, reluctant child to swallow it by holding his nose.

Umbrella Works Well

Because one cannot carry an umbrella when wearing a uniform and maintain one's dignity, the rain shields have gone out of style in Germany. As a result 100,000 people in the umbrella industry have been thrown out of work and manufacturers are seeking ways and means to bring the umbrella into its own again.

Another Surgical Find

Human Suffering Reduced By Operation On Pain Nerves

Surgery on the nerves of pain offers hope of reducing human suffering.

The operations possible were reviewed by Francis C. Grant, M.D., of Philadelphia, at the meeting of the American College of Physicians.

Some of the fibres form the bundles of nerves, just as separate fibres form threads, carrying the sensation of pain; others give the movement orders.

By cutting the pain fibres in the spinal cord pain can be stopped in the legs and up into the pelvic. Touch and position nerve fibres remain unimpaired and the movements of the legs are not interfered with.

Another operation severs the roots of some of the nerves but is seldom used because, while it relieves pain, it interferes with movement.

Another operation severs the roots of some of the nerves but is seldom used because, while it relieves pain, it interferes with movement.

Powerful Searchlight

Throws Beams Which Will Illuminate Objects Within Fifty Miles

Residents of Pittsburgh city gazed in wonderment at a powerful shaft of light that penetrated the darkness for many miles. It originated from what engineers say is probably the world's most powerful mobile searchlight undergoing a test prior to its delivery to the United States army.

The searchlight is a 60-inch giant and throws a beam of 750,000 candle power. Engineers who have it say the light's concentrated, narrow beam will illuminate any object within 50 miles. The "detecting" equipment is entirely mobile, carried aboard trucks.

An aeroplane with a 100-foot wing spread flying 20,000 feet high and six miles away appears to the human eye about as big as a wasp.

To find an enemy bombing plane under such conditions—and traveling at 250 miles an hour—would be quite difficult. The searchlight is designed to do it, and expose the plane to the fire of anti-aircraft artillery.

Upholding The British

New York Paper Sticks To State's Right About Debt

The New York Daily News says: "We've received a number of unfavorable letters in reply to our editorial in which we said England is right in refusing to pay any more of its war debts to us for the time being. These letters advise us that we are in the pay of the Redcoats, traitors to Uncle Sam, trying to lick the King's boots, etc."

Let's come down to brass tacks. How about our debts to our own people and to any foreigners who happened to buy our bonds? We aren't paying them, are we? President Roosevelt has taken 40 cents out of every dollar, and he won't pay a dollar of those debts in gold. Furthermore, our Supreme Court sustained that default. So if John Bull is a nasty old repudiator, what is Uncle Sam?

The fact is the war cost so much that every country which took part in it, including ourselves, has had to repudiate a large part of its war debts."

Caneels For Russian Farms

Farmers of Soviet Russia are to be supplied 257 caneels this year to be used in the establishment of new caneel factories. The caneels are the samirad Yedich district of Western Kazakhstan have 2,335 ships of the desert, the herd increasing 24 per cent. in 1934.

How Spare Pennies Grow

British Post Office Savings Increased By \$25,000,000 Last Year

More pennies and shillings than ever are being put into Post Office Savings Banks in Britain.

The head office has announced that deposits of small savers have reached the record figure of £55,000,000. They increased by £28,000,000 during last year alone. Over the last two years they have increased by £50,000,000.

These large sums are made up entirely of the occasional spare coins of villagers and townsmen in Britain. One of the methods of saving is to buy special stamps and stick them in a savings book. When a certain number have been collected the book is given in the local post office and the amount represented is credited to the saver's account.

Last year 250,000 "Post Office" were issued. These are special post office money boxes which can be taken to the local post office when the owner desires and the amount in them credited to his account.

The Post Office Savings Bank now has more than 9,500,000 depositors. And that number is increasing by 12 per cent. each year.

Are Becoming Important

Aviation Is Creating Interest In Islands Of Ocean

Soon every little island in the ocean is going to find itself important and it is certain that, with aviation developing as it is, places which in the past have not even been spots on the map will become centres of interest. Here, for instance, is the case of the Wake Islands, away out in the Pacific Ocean. These are three small islets, with a total area of not more than 2,600 acres, yet they are to be a point of call on the proposed U.S.-China air route, plans for which are now well under way with Pan-American Airways and the United States Government co-operating.

If on your pyjamas in the morning you stand in your pyjamas before the open window and slap your chest with both hands for several minutes you will notice a crowd slowly gathering in the street below.

Clubs for railroad workers are being organized in Russia.

Bible Distribution

Colporters Deliver An Average Of 30,000 Bibles A Month

By dog team in the far north and on foot through every part of Canada, Colporters distribute an average of 30,000 Bibles a month, according to the annual report of the Canadian branch of the British and Foreign Bible Society.

An increased demand for Bibles in English is reported from foreign language groups of workers in Western Canada.

After all expenses were met, \$39,000 was sent to London for worldwide work compared with \$23,000 in 1933. Bibles distributed showed an increase of 22,000.

Planning

In these days much is heard of the art of planning and the dire necessity for scientific, constructive planning in finance, economics, industry, social services, in fact in all the organization of our modern life and its varied interests and activities. Indeed, if a person was prepared to unthinkingly accept the advice being so freely tendered in many quarters, only one conclusion would be reached, namely, that mankind in mass could, if it would, definitely plan and order its way of life, and clearly and authoritatively scale and draw a plan that would work with the simplicity and accuracy of the multiplication table.

But life is not like that; too many contrary factors enter into the scheme of things and life, too many factors, influences and natural laws which are beyond human control to permit of any such artificial planning that will prove workable and fool proof. As the poet Burns so well expressed it:

The best laid schemes of mice an' men
Gang aft a-gley,
An' leave us naught but grief and pain,
For promised joy.

Two years ago President Roosevelt's "brain trust" decided that the whole economic life of the United States could be planned and chartered in advance, that it could scientifically plan and control the production of that great country so as to overcome and prevent what was alleged to be the evils of over-production. It set out to do so, but instead of facing the primary cause of the alleged over-production, it adopted and acted upon a false formula that all that was necessary was to compel by law a reduction in the volume of production.

So what farmers were bonused, not to grow wheat, but to stop growing it; cotton planters were bonused to stop growing cotton; farmers were paid to quit raising hogs and so on and so forth, and the consuming masses of the people were taxed in order to raise the funds wherewith to pay these bonuses on destruction. Then Nature stepped in, withheld its usual bountiful supply of rain, sent excessive heat and blistering winds and swirling dust storms, and in a brief space of time reduced production over man's mistaken efforts, and to a far greater extent, until within a few months a shortage of supplies faced the nation instead of an over-production, which over-production had actually resulted from a previous form of artificial planning in the shape of tariffs and other trade restrictions.

Following the Great War, the statesmen of the world assembled in Paris to draft a treaty of peace and to plan the future of Europe and the world. They labored for months, created elaborate international machinery to direct and control world affairs, re-arranged the boundaries of countries, and gave birth to new nations. On paper their plans looked good; they were hailed as a great advance in the cause of world peace and international goodwill and co-operation.

But in the years that have followed all the passions, prejudices, suspicions, racial and religious animosities, and vagaries of human nature have continued to hold sway over millions of mankind. Much of the planning has proved an abject failure, some of it has been thrown into the discard, and what remains is in danger of destruction through another world upheaval.

Thus has it been amply demonstrated that man cannot direct and control the immutable laws of Nature, nor can he forecast them in any scheme of planned economy he may devise; neither can a few planners, however able and sincere they may be, draft plans and laws which will do despite all the selfishness, the ambitions, the ignorances, passions and prejudices of man.

This being so, the nations are now being told by the planners that mankind in the mass can no longer be trusted; that democratic forms of government are a failure; that instead of the people creating and controlling their governments, forms of government must be set up which, controlled and directed by a few, will super-impose their will upon the masses, control and order the people, instead of the people controlling the governing bodies.

Such a plan may be inaugurated; it may work for a time, but not for long. It can never possess any degree of permanence, because man was created a free being with a mind, a will, and a soul of his own, and in the final analysis he will, because God and his own nature intended that he must, work out his own salvation. No other power, and least of all a government, can do it for him.

Nevertheless, there must be planning and there must be control and direction. Everything cannot be left haphazard, otherwise chaos and disorder would ensue. But it must be recognized that there are limitations in all planning, and those imposed by Nature's laws and by human frailties cannot safely be ignored. No man desires and does not desire the domination of every man to be a free man and enjoy liberty; he desires, any attempt to do so will breed revolt. It always has; it always will. But liberty does not mean license, and in demanding liberty for himself each man must recognize the rights of others and accord liberty to others.

Therefore, in all our planning the improvement and advancement of the individual must precede improvement of and advancement in any system that may prevail. It is putting the cart before the horse to try and improve the system first and then improve the man; it is putting the tail before the head. God does not remove all evil and temptation. We are taught to resist temptation, to pray that we be not led into temptation.

The proper status of mankind is man, and the proper, only permanent, planning is by individual man, namely, that he so order his life and his activities, so control his ambitions and his passions, as to come within the plan laid down in the Golden Rule—Do unto others as you would that they should do unto you.
